

Gemini Pro Breakthrough

In this slide deck we aim to

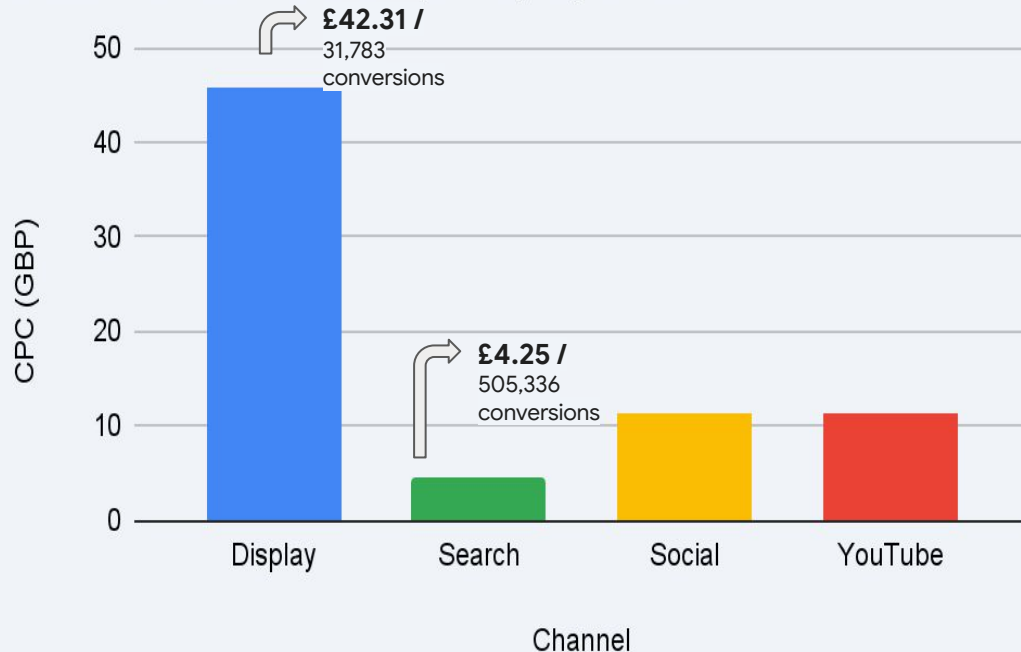

Analyse historical data to ascertain effective strategies for engaging university students with Google's Gemini.

Present five critical insights derived from the analysis.

Formulate a data-driven strategy to accelerate Gemini's ascendancy as the preeminent large language model globally.

Search is our most efficient channel, whereas Display was the most costly

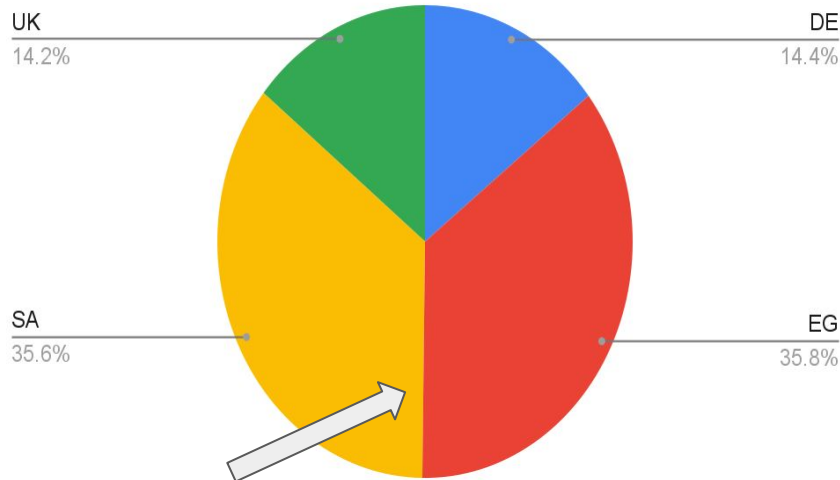

Cost Per Conversion (CPC) by Channel

Search excelled in total conversions and efficiency. Despite Search's high Cost Per Mille relative to the average (2.84 vs. Display's 0.14), this indicates its value as a sought-after channel.

SA and EG prove to be the most profitable markets to launch campaigns in

Total Conversions by Market

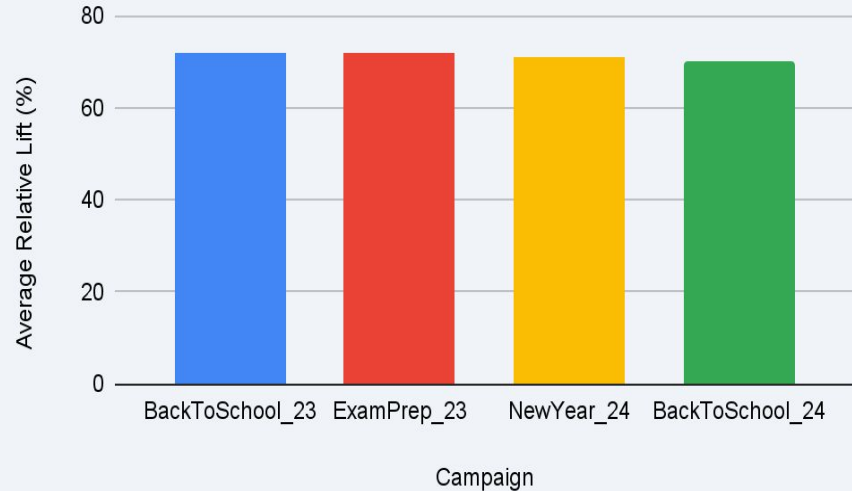

SA and EG each had about 200k more conversions than each of UK and DE

In terms of efficiency SA and EG had a CPC of 4.92 GBP and 5.06 GBP each, whereas UK and DE were very expensive relative to the low volume of conversion with each having more than 3x the CPC of SA and EG.

Campaigns drove roughly the same amount of users on average

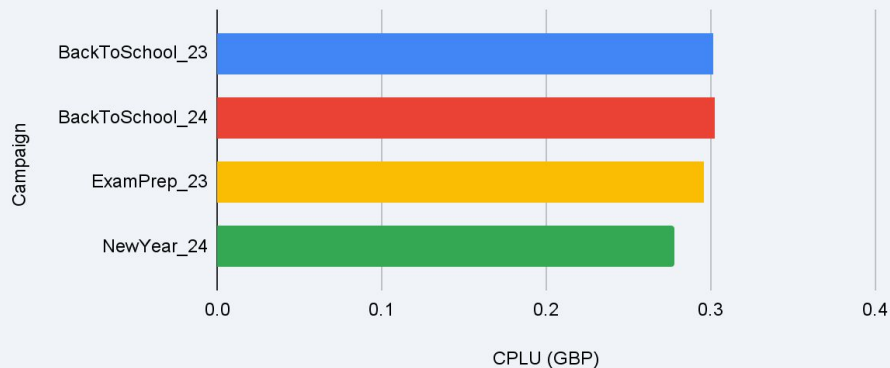

Average Relative Lift by Campaign (Statistically)

The Display channel was utilised by all statistically insignificant campaigns, which originated solely from the UK or DE markets. They also accounted for approximately 10% of all campaigns, distributed equally.

New Year 24 was the most cost efficient campaign by far

Average Cost per Lifted User (CPLU) by Campaign

The Back To School campaigns were the least efficient, costing up to 0.3 GBP for each user lifted, with the Exam Prep campaign not too far behind in cost.

The Life Hack Creative dominated in driving consideration, whereas it's more split when it comes to Purchase intent amongst 18-24 year olds

- The Grade Booster Ad particularly excelled at purchase intent in the EG market, with an absolute lift of 3.44 compared to Life Hack's 3.28
- There was weak correlation between the awareness lift of an Ad and the consideration/purchase intent it drove.

Recommendations

Budget Allocation & Strategy

- Allocate 65% of each market's budget to the Search channel.
- Minimal allocation to Display (< 10%)
- Focus on reiterating the New Years campaign in the SA and EG markets, setting > 80% of budget to campaigning in them
- Prioritise using the Grade Booster Ad in the EG market only, and the Life Hack one in all the others.

Campaign Timeline

- Weeks 1-2: Launch Campaign in all markets, with the mentioned budget allocation and strategy.
- For the rest of the duration, re-evaluate the performance of the campaign and invest more in markets/channels the ones that drive more consideration lift.

Thank You!
